Education

University of Crete, Department of Computer Science
BSc in Computer Science

Herakleion, Crete
2022 – 2026

Experience

FORTH-SPL

Heraklion, Crete

Software Developer

April 2024 – September 2026

- Engineered an end-to-end dataset pipeline that assembles MEDIC, ECCV M1, and supplemental web imagery into earthquake, flood, and wildfire train/val splits using multithreaded downloads, gdown/aria2, and Pillow-based integrity checks.
- Developed a Flask web application with an EfficientNet-B0 classifier for upload-based disaster prediction and map-driven Sentinel-2 before/after change detection, fusing OpenCV diff with patch-level classification and confidence thresholds.
- Automated geospatial workflows with Sentinel Hub OAuth, tiled imagery retrieval for large map areas, SQLite/PostgreSQL response caching, and Docker Compose deployment for repeatable analyst workflows.

Algorithmics Greece

Remote

Python Programming Instructor

November 2024 – Present

- Teaching Python to student groups (ages 12–16), focusing on algorithmic thinking and problem-solving
- Supporting hands-on programming projects while adapting content to diverse learning styles and paces

University of Crete, Computer Science Department

Heraklion, Greece

Teaching Assistant

October 2023 – June 2024

- Supported instruction for CS108, CS109, CS208, and CS209 (English I-IV)
- Managed course materials and platforms, and provided feedback on student assignments

Volunteering

Region of Crete

Heraklion, Crete

Software Developer

April 2024 – September 2024

- Collaborating with a team of three students to design and develop a user-friendly website for Youth Crete using HTML, JavaScript, and CSS

Career Fair, University of Crete

Heraklion, Greece

Main Organizer

December 2024

- Led the organization of the Computer Science Career Fair at Voutes Campus, coordinating a team of twenty students in collaboration with the UoC Career and Liaison Office

University of Crete, Computer Science Department

Heraklion, Greece

Guide

January 2024, January 2025

- Assisted in welcoming school groups during the Departments School Visits Week
- Guided visitors through activities and presentations, showcasing the department's programs and research

Projects

Reviews Classifier

GitHub

- Sentiment analysis toolkit with a comprehensive L^AT_EX report; implements multiple ML algorithms for text classification and sentiment detection.

Event Management System

GitHub

- Full-stack booking platform built with Python and Flask; user authentication, event creation, and booking management with a modern UI.

Alpha Compiler

GitHub

- Educational compiler in C with a complete lexer, parser, and code generation pipeline.

Media Downloader

GitHub

- GUI application for batch multimedia downloads using yt_dlp and PyQt5; progress tracking and format selection.

Honours and awards

DEPROFOIT Distinction – University of Crete

2025

Computer Science Department

Praise awarded for successfully undertaking teaching assistantship duties during the academic year. Related courses included CS108, CS109, CS208, and CS209.

F.O.R.T.H. Undergraduate student scholarship

July 2025 – September 2026

Foundation for Research and Technology (Signal Processing Laboratory)

Merit-based scholarship awarded to undergraduate students actively contributing to SPL research. Valid through continued productivity and engagement until graduation.

Skills & interests

Technical Skills:

Proficient: Python, C, Microsoft Office Suite, L^AT_EX

Intermediate: C++, Java, SQL, Git

Languages:

Native: Greek, Armenian

B2: English

Interests:

Basketball, chess, hiking
